

Texas Underground Storage Tank Facility Class C Operator Training Checklist

Class C Operator Name: _____

UST Facility Name: _____

UST Facility Address: _____

TCEQ PST Facility Number: _____

All Texas underground storage tank (UST) facilities which store regulated substance as defined in TCEQ rule in Title 30, TAC, Chapter 334, Subchapter A, Section 334.2(91) must have a certified "Class C" Operator on-site at all times during normal business hours (unmanned facilities excluded). A Class C operator of a UST facility is an individual designated by the UST system owner who typically controls the dispensing of fuel at the facility and is responsible for initial response to alarms, releases, spills, overfills or threats to the public or to the environment. Class C operators must be trained in both **general and facility-specific** emergency response procedures, including:

- ☐ Operation of emergency shut-off equipment
 - Emergency Shut-Off Switch Operation and Location
- ☐ Initial response procedures following system alarm warnings
 - Leak Detection Console (if applicable): Warnings & Alarms
- ☐ Appropriate first response actions to releases, spills, or overfills
 - Evidence of a Possible Leak
 - Clean-Up Materials: Location, Use, and Disposal
- ☐ Notification procedures to emergency responders and to the designated Class A and Class B operators of the UST facility.
 - Location of Document Detailing Site-Specific Emergency Procedures
 - Location of Site-Specific Notice Detailing Locations of Emergency Shut-Off Devices and Appropriate Emergency Contact Numbers

By my signing below, I certify that I have received training in the listed topic areas.
